⁽⁵⁾ For multisplit appliances, data shall be provided at a Capacity ratio of 1.

^(**) If default Cd= 0,25 is chosen, then results from cycling tests are not required. Otherwise either the heating or cooling cycling test value is required

Product Fiche

Model: X3I ECO PLUS 27 SH / X3I ECO PLUS 27 HL WF

Manufacturer: ARGOCLIMA SPA - via Alfeno Varo, 35 - Alfianello (BS) - Italy;

Sound power level (indoor unit / outdoor unit): 54 / 61 dB(A);

Refrigerant: R32

Refrigerant leakage contributes to climate change. Refrigerant with lower global warming potential (GWP) would contribute less to global warming than a refrigerant with higher GWP, if leaked to the atmosphere. This appliance contains a refrigerant fluid with a GWP equal to 675. This means that if 1 kg of this refrigerant fluid would be leaked to the atmosphere, the impact on global warming would be 675 times higher than 1 kg of CO₂, over a period of 100 years. Never try to interfere with the refrigerant circuit yourself or disassemble the product yourself and always ask a professional.

Cooling mode

SEER: 7,5

Energy efficiency class: A++

Pdesignc: 2,7 kW

Annual electricity consumption 126 kWh per year, based on standard test results. Actual energy consumption will depend on how the appliance is used and where it is located.

Heating mode

Climate type: Warmer / Average / Colder

SCOP: 5,3 / 4,2 / 3,4

Energy efficiency class: A+++/A+/A

Pdesignh: 3,0 / 2,7 / 4,0 Kw

Declared capacity: 3,0 / 2,7 / 2,1 kW

The back up heating capacity for SCOP calculation: 0 / 0 / 1,9 kW.

Annual electricity consumption **792** / **900** / **2471** kWh per year, based on standard test results. Actual energy consumption will depend on how the appliance is used and where it is located.
