<sup>(5)</sup> For multisplit appliances, data shall be provided at a *Capacity ratio* of 1.

(\*\*) If default Cd= 0,25 is chosen, then results from cycling tests are not required. Otherwise either the heating or cooling cycling test value is required

## **Product Fiche**

Model: ARGO DELUXE 9000 UE / ARGO DELUXE 9000 UI

Manufacturer: ARGOCLIMA SPA - via Alfeno Varo, 35 - Alfianello (BS) - Italy;

Sound power level (indoor unit / outdoor unit): 54 / 61 dB(A);

Refrigerant: R32

Refrigerant leakage contributes to climate change. Refrigerant with lower global warming potential (GWP) would contribute less to global warming than a refrigerant with higher GWP, if leaked to the atmosphere. This appliance contains a refrigerant fluid with a GWP equal to 675. This means that if 1 kg of this refrigerant fluid would be leaked to the atmosphere, the impact on global warming would be 675 times higher than 1 kg of CO<sub>2</sub>, over a period of 100 years. Never try to interfere with the refrigerant circuit yourself or disassemble the product yourself and always ask a professional.

## Cooling mode

**SEER:** 8.5

Energy efficiency class: A+++

Pdesignc: 2.7 kW

Annual electricity consumption 112 kWh per year, based on standard test results. Actual energy consumption will depend on how the appliance is used and where it is located.

## **Heating mode**

Climate type: Average (-10°C) / Warmer (+2°C) / Colder (-22°C)

SCOP: 4.6/5.9/-

Energy efficiency class: A++/A+++/-

Pdesignh: 2.3/2.6-kW

The back up heating capacity for SCOP calculation: # kW.

Annual electricity consumption **700/618/-** kWh per year, based on standard test results. Actual energy consumption will depend on how the appliance is used and where it is located.
